B) Report

i. Title

Guest lecture on "Issues and Opportunities of Biotechnology in COVID-19" on occasion of celebration of Biotechnology Day

ii. Introduction

At its simplest, biotechnology is technology based on biology - biotechnology harnesses cellular and biomolecular processes to develop technologies and products that help improve our lives and the health of our planet. Modern biotechnology provides breakthrough products and technologies to combat debilitating and rare diseases, reduce our environmental footprint, feed the hungry, and use less and cleaner energy, and have safer, cleaner and more efficient industrial manufacturing processes. Department of Biotechnology celebrated Biotechnology Day by organizing Guest Lecture on "Issues and opportunities in Biotechnology in COVID-19." on 23.11.2020

iii. Objectives of the Programme / issues addressed:

- To inculcate the research culture and its importance among the biotechnology students
- To train the students on possible contributions of biotechnology in COVID- 19
- To make aware the participants on current social and health issues in COVID-19 pandemic

iv. Details of Participants

Total 144 participants attended the program in online mode using zoom platform (Male 58 and Female 86)

v. Brief Summary of Events/ Session/ Conclusion:

Dr. N.V. More, Head Department of Biotechnology COCSIT College Latur, elaborated biotechnology as applied area of biology, involving the use of living systems and organisms to develop products. Dr. N. V. More highlighted the corona pandemic has really unveiled the true importance of the biotechnologist. We all are hoping that very soon they will come up with something that will put an end to this global suffering. The biotech industry is also hit due to the shortage of supply, supply chain disruption, transportation issues, and many other problems. But on the other hand, this pandemic has opened lots of scope and opportunities for this industry.

vi . Conclusion with feedback

As the theme of program was focused on current issues and the opportunities in biotechnology in reference to COVID-19 pandemic, the students were made aware of the job roles they can play in coping up with the COVID pandemic and how they can help and

contribute to the society in coming out of the sufferings faced during the pandemic. Along with coping with the pandemic situation a guidance was also made to fetch new job opportunities a biotechnologist can have in near future in various areas like COVID 19 diagnosis, vaccination and also to contribute in similar situations like COVID 19 in case we face in near future.
