B) Report:

i) **Title:** Guest Lecture on Principles of Plant Disease Management.

ii) **Introduction:**

The crop plants fulfill the food and other demands of the mankind. The crop plant suffers from variety of diseases. The diseases results into dramatic declination of the yield. To know the different types of plant diseases and their management, department of Botany Organized Guest Lecture on Principles of Plant Disease Management to educate the pupils about basics in Principles of Plant Disease Management. The goal of plant disease management is to reduce the economic and aesthetic damage caused by plant diseases. Traditionally, this has been called plant disease control, but current social and environmental values deem "control" as being absolute and the term too rigid.

iii) **Objectives of the programme:**

1. To understand the Principles of Plant Disease Management.
2. To enable the students to identify plants Pathogens.
3. To know the different types of plant diseases and symptoms.
4. To know advanced methods of disease Management.

iv) **Details of participants:** 155, (Students-150, Teachers-05)
