B) Report

i) Title: Exhibition of Miniature models of Gardening and Land Scaping

ii) Introduction:

Landscape gardening is an aesthetic which deals with planting of ornamental plants in such a way that it creates a pictures effect. Landscape gardening is the art of laying grounds so as to produce the effect of a pictures of landscape. It is done with a view to create a natural scene by the planting of lawn, trees and shrubs. Landscape gardening is both an art and science of the establishment of a ground in such a way that it gives an effect of a natural landscape. The designer should architect and engineer in art, ornamental gardening, ecology and physiology.

Gardening helps in growing fruit and vegetables. It reduces our overall impact on the environment and carbon footprint. In this sense gardening is an activity that empowers people and unites all humans in our one common need to be in touch with nature.

iii) Objectives of the Programme / issues addressed:

1. To create interest and apply innovative ideas in gardening.
