

Rajarshi Shahu Mahavidyalaya (Autonomous), Latur
Department of Information Technology
A) A Summary Report of the Activity

1) Title of Programme:	Four Week Online Certificate Courses		
2) Name of Organizing Department:	Department of Information Technology		
3) Name of the Coordinator(s)/ Convener(s)/ Organizer(s) of the Programme:	Programme Coordinator: 1) Dr.ShivrajPatil 2) Prof.Chandraprabha Kulkarni 3) Prof.ManjushaShinde		
4) Date(s) of the Programme:	04.09.2020 to 12.10.2020		
5) Venue/Mode:	Online through Google Drive		
6) Target Group:	Anyone can do these courses		
7) Number of Participants / Name of Course:	No. of Registered Student for course	No. of Students Appeared for Examination	No. of qualified Students
Python Programming	872	229	127
Software Development with C#	729	185	107
Advanced Techniques in Computer Network	577	161	137
8) Name(s) and details of Resource Person(s), if any:	Python Programming 1. Mr. Riyaj Shaikh 2. Mr. Vishwanath Panchal Software Development with C# 1. Mr. Manoj Birajdar 2. Miss. JyotiMashalkar Advanced Techniques in ComputerNetwork 1. Mr. Aman Shaikh 2. Mr. MahadevBhatade		
9) Total Expenditure for the Programme:	1000/-		
10) Source of Funding:	College		

B) Report

i. Title

Four Week Online Certificate Courses

ii. Introduction

Certification courses enrich the skills of students and teachers. Keeping this in mind, the Department of Information Technology has started three online certificate courses of four weeks namely Python Programming, Software Development with C# and Advanced Techniques in Computer Network.

iii. Objectives of the Workshop/ Certificate Course

- To provide knowledge about Python Programming
- To provide knowledge about Software Development with C#
- To provide knowledge about Advance Techniques in Computer Network

iv. Details of Participants

- 1) Python Programming: Students qualified 127 (Male: 63, Female:64)
- 2) Software Development with C#: Students qualified 107 (Male: 69, Female: 38)
- 3) Advanced Techniques in Computer Network: Students qualified 137 (Male: 86, Female: 51)

v. Brief Summary of Events / Sessions

Python is widely used by a number of big companies like Google, Pinterest, Instagram, Disney, Yahoo, Nokia, IBM, and many others. The Raspberry Pi – which is a mini computer and DIY lover’s dream – relies on Python as its main programming language too. You’re probably wondering why either of these things matter, and that’s because once you learn Python, you’ll never have a shortage of ways to utilize the skill.

According to the 2015 Stack Overflow developer survey, C# is the third most popular object-oriented language. The flexibility of C# is a huge benefit compared to some languages. Although it is possible to do all of these things with other languages as well, it usually involves piecing together some variety of third-party tools to make it all work, whereas C# developers have a very cohesive Microsoft-supported set of tools for developing any type of application.

Computer network professionals are the ones who make sure computer systems are running smoothly. Becoming a computer networking professional can help you become a positive influence in many different industries. You have the ability to help protect colleagues’ and customers’ private information. You can also help manage networks so people can live their lives and do their jobs better. The global importance of the Internet could also give you the opportunity to travel and help other people and businesses around the world.

vi. Conclusion, with Feedback on the workshop / certificate course

There is a huge response to the online certificate course conducted. The participants are from across the country. The final exam was conducted and the e-certificate was issued to those participants who successfully submitted all four-week assignments and passed the final exam.

vii. Any Appendix If Necessary

List of Participants attached

Date: 25.10.2020

C) Geotagged Photographs/ Screenshots

The screenshot shows a video player interface. The main content is a slide titled "Method Overloading". The slide text explains that it is not possible to define more than one method with the same name in a class in Python because method arguments don't have types at the time of definition. An example code snippet is provided: `def mymethod(a=0,b=0,c=0): return(a+b+c)`. The video player controls at the bottom show a pause button, a volume icon, a progress bar at 1:00 / 12:13, and icons for chat, settings, and full screen. A small video inset of the teacher is visible in the bottom right corner of the slide.

Method Overloading

It is not possible to define more than one method with the same name in a class. Because in python method arguments don't have types at the time of definition.

Example:
`def mymethod(a=0,b=0,c=0):
 return(a+b+c)`

1:00 / 12:13

Course Teacher Mr. Shaikh R. S. S. explaining method overloading

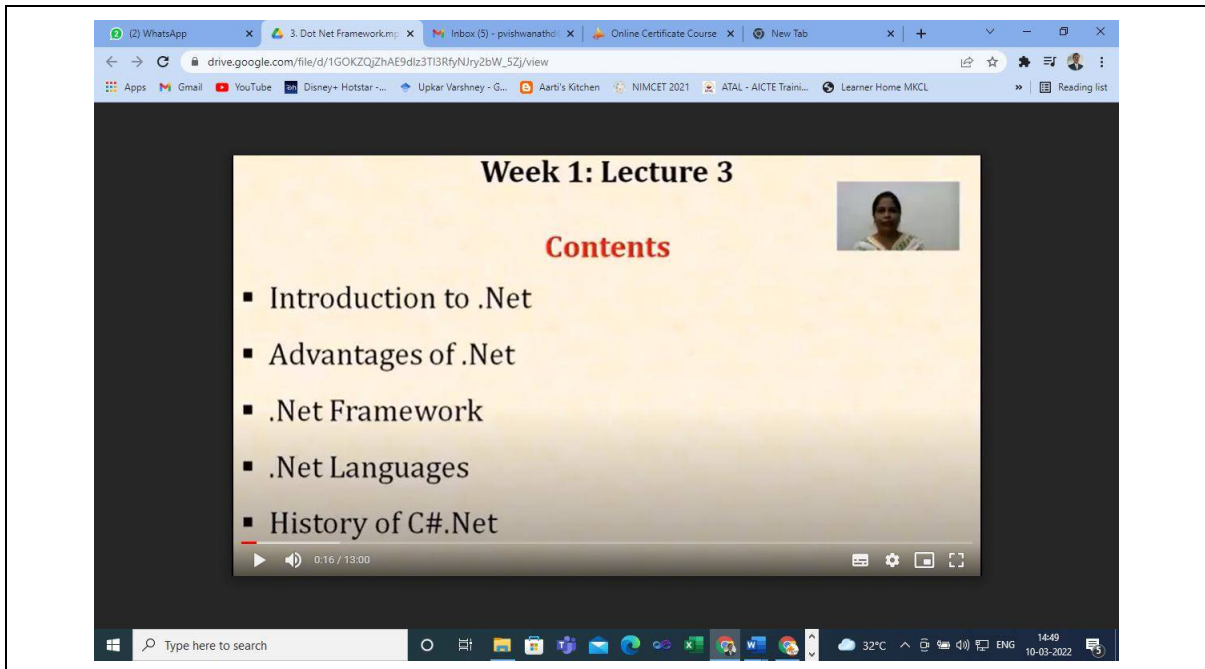

The screenshot shows a video player interface. The main content is a slide titled "Working with Lists". The slide includes an "Introduction:" section with five bullet points describing list characteristics in Python: they provide string, list, and tuple sequence types; support membership operator (in), len(), slices, and iteration; are ordered, comma-separated collections of items; can be sliced, concatenated, and indexed; and are mutable. The video player controls at the bottom show a play button, a volume icon, a progress bar, and icons for chat, settings, and full screen. A small video inset of the teacher is visible in the bottom right corner of the slide.

Working with Lists

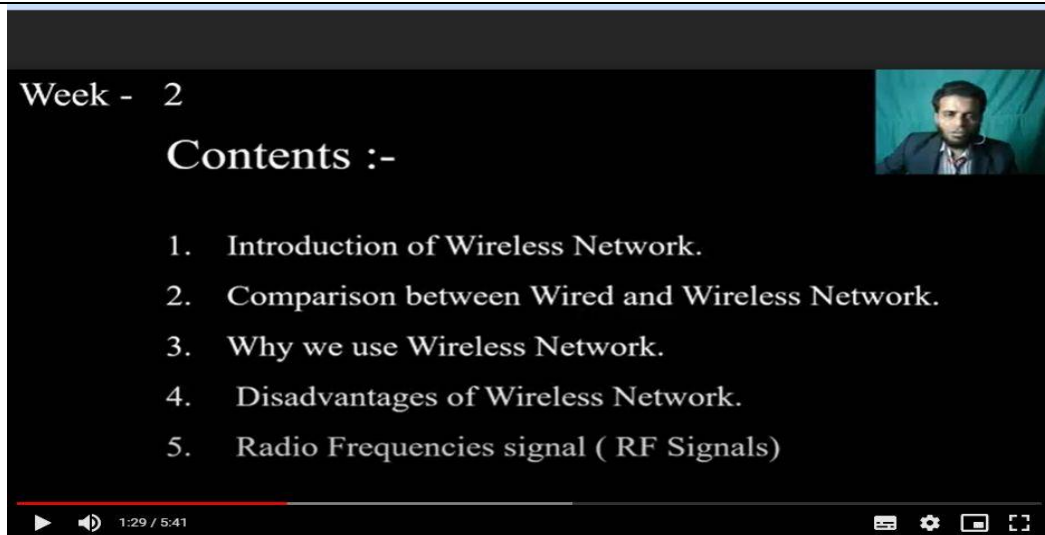

Introduction:

- Python provides string, list and tuple sequence types.
- A sequence type supports the membership operator (in), the size function (len()), slices ([]), and is iterable.
- A list is an ordered, comma-separated collection of items. Items need not all be of the same type, an item may also be another list.
- Lists can be sliced, concatenated, and indexed.
- Lists are mutable, which means we can add or remove items from a list so, the size of the list can grow or shrink when needed.

Course Teacher Mr Vishwanath Panchal explaining lists in Python

Course Teacher Miss Jyoti Mashalkar delivering the .Net Framework

Course Teacher Mr. A. K. Shaikh explaining wireless networks
