B) Report

i. Title

Four Week Online Certificate Courses

ii. Introduction

Certification courses enrich the skills of students and teachers. Keeping this in mind, the Department of Information Technology has started three online certificate courses of four weeks namely Understanding Python, C#.Net Programming and Advanced concepts of Computer Networking.

iii. Objectives of the Certificate Courses

- To provide knowledge about Python Programming
- To provide knowledge about C#.Net Programming
- To provide knowledge about Advanced Concepts of Computer Networking

iv. Details of Participants

- 1) Understanding Python: Students registered 300 and qualified students 43
- 2) C# .Net Programming: Students registered 266 and qualified students 63
- 3) Advanced Concepts of Computer Networking: Students registered 266 and qualified students 66

v. Brief Summary of Events / Sessions

Python is widely used by a number of big companies like Google, Pinterest, Instagram, Disney, Yahoo, Nokia, IBM, and many others. The Raspberry Pi—which is a mini computer and DIY lover's dream – relies on Python as its main programming language too. You're probably wondering why either of these things matter, and that's because once you learn Python, you'll never have a shortage of ways to utilize the skill.

According to the 2015 Stack Overflow developer survey, C# is the third most popular object-oriented language. The flexibility of C# is a huge benefit compared to some languages. Although it is possible to do all of these things with other languages as well, it usually involves piecing together some variety of third-party tools to make it all work, whereas C# developers have a very cohesive Microsoft-supported set of tools for developing any type of application.

Computer network professionals are the ones who make sure computer systems are running smoothly. Becoming a computer networking professional can help you become a positive influence in many different industries. You have the ability to help protect colleagues' and customers' private information. You can also help manage networks so people can live their lives and do their jobs better. The global importance of the Internet could also give you the opportunity to travel and help other people and businesses around the world.

vi. Conclusion, with Feedback on the Courses

There is a huge response to the online certificate course conducted. The participants are from across the country. The final exam was conducted and the e-certificate was issued to those participants who successfully submitted all four-week assignments and passed the final exam.

The slide is titled "Working with Lists" and features the Python logo in the top right corner. It includes an "Introduction:" section with the following bullet points:

- Python provides string, list and tuple sequence types.
- A sequence type supports the membership operator (in), the size function (len()), slices ([]), and is iterable.
- A list is an ordered, comma-separated collection of items. Items need not all be of the same type, an item may also be another list.
- Lists can be sliced, concatenated, and indexed.
- Lists are mutable, which means we can add or remove items from a list so, the size of the list can grow or shrink when needed.

A small video feed of the instructor is visible in the bottom right corner.

4G and 5G Network.

5G Network:

5G wireless technology is meant to deliver higher multi-Gbps peak data speeds, ultra-low latency, more reliability, massive network capacity, increased availability, and a more uniform user experience to more users. Higher performance and improved efficiency empower new user experiences and connects new industries.

5G is designed to not only deliver faster, better mobile broadband services compared to 4G LTE, but can also expand into new service areas such as mission-critical communications and connecting the massive IoT.

Features	1G	2G	3G	4G	5G
