Department of Mathematics  
A) A SUMMARY REPORT**

1) Title of Programme:		Popular Talk on "How to cut an Uthappam to get the desired number of pieces?"		
2) Name of Organizing Department/Unit:		Mathematics		
3) Name of the Coordinator(s)/ Convener(s)/ Organizer(s) of the Programme:		Convener: Dr. Mahesh S. Wavare		
4) Date(s) of the Programme:		14.03.2021		
5) Venue/Mode:		Online Microsoft Teams		
6) Target Group:		UG and PG (Mathematics)		
7) Number of Participants:		Male	Female	Total
A separate list with signatures be maintained in the department/Unit)	Teaching	05	01	06
	Non-Teaching	00	00	00
	Students	37	85	122
	Alumni	04	04	08
	Participants from Outside RSML	64	79	143
8) Name(s) and details of Resource Person(s), if any:		Dr. Priyavrat Deshpande, Assistant Professor CMI, Chennai		
9) Total Expenditure for the Programme:		Nil		
10) Source of Funding:		NA		

## B) A Report

**i. Title:** Popular Talk on How to cut an Uthappam to get the desired number of Pieces?

**ii. Introduction:**

On the occasion of Pi Day, Department of Mathematics, Rajarshi Shahu Mahavidyalaya, Latur Organizes a Popular Talk on the title "How to cut an Uttapam to get the desired number of pieces?" by Dr. Priyavrat Deshpande of Chennai Mathematical Institute, Chennai Just like other sciences Mathematics too has a strong experimental flavor. The true nature of Mathematics involves stating a hypothesis, a lot of experimentation, pattern recognition, followed by the development of a theory. Even though this process is not easy to demonstrate in a classroom setting we are going to give it a try during this presentation. Programme will focus on an easy-to-describe problem in combinatorial geometry: Given  $n$  straight lines in the plane in how many pieces do they break the plane?

**iii. Objectives:**

- To get knowledge of basic Number Theory
- Explore terms in Combinatorics
- To Understand use of Mathematics in Real Life
- To get aware of basics of counting Principle
- To make experiments using plain paper
- To recognize Pattern

**iv. Details of Participants:**

Total 279 (110 Male and 169 Female) participants were present.

**v. Brief Summary of Events/ Sessions**

It was a popular talk by eminent Mathematician Dr. Priyavrat Deshpande, CMI, and Chennai. Dr. Mahesh Wavare introduces the resource person as well as program at the beginning. Resource person focuses the experimental work and participants were actively involved in it. Vice-Principal, Prof. S N Shinde concludes the presidential remarks.

**vi. Conclusion, with Feedback on the Programme:**

Students get the knowledge about Basic Concepts of Combinatorics. Participants did experiments and resource person focuses on the process of arriving at a solution rather than the solution itself. Participants came to know how professional mathematicians come up with new questions while working on a solution for a different problem.

**vii. Any Appendix if necessary**

**About College**

Rajarshi Shahu Mahavidyalaya (Autonomous), Latur is the only Autonomous college in Marathwada Region. The college has taken the pivotal step of Autonomous Status in 2013. This institution was established in 1970, which bears the name of a true democrat, social reformer, educationist and the progressive king of Kolhapur Sansthan, Chhatrapati Rajarshi Shahu Maharaj. The motto of our institution is Pursuit of Excellence.

The college has UGC-CPE (Phase III) status and support under DST-FIST scheme. It has empowered us to introduce innovations in Academics and Research. The Autonomous status of the college has made the programs and courses more divergent and need satisfying. Under the new accreditation framework of NAAC, the college received B++ (CGPA 2.99) in 2018.

The fifty years history of our Sanstha was full of trials and tribulations. We have accepted the challenges and conquered the adversities to reach at the apex of success. We are always pragmatic, resourceful and creative on every front. Through tireless efforts and selfless service we have evolved a Shahu Pattern which is widely known as **Latur Pattern** of education.

(Principal)

**Abstract of Talk**

Just like other sciences Mathematics too has a strong experimental flavour. The true nature of Mathematics involves stating a hypothesis, a lot of experimentation, pattern recognition, followed by the development of a theory. Even though this process is not easy to demonstrate in a classroom setting we are going to give it a try during this presentation. I will focus on an easy-to-describe problem in combinatorial geometry: Given  $n$  straight lines in the plane in how many pieces do they break the plane?

During the talk we will together do a lot of experiments and focus on the process of arriving at a solution rather than the solution itself. I will also demonstrate how professional mathematicians come up with new questions while working on a solution for a different problem.

**Note: The talk is interactive and will require the audience to actively participate. So be ready with your writing material to draw a lot of pictures and solve a lot of equations**
