B) Report

i. Title

Guest Lecture on Vermicomposting Awareness

ii. Introduction

Vermicomposting is the process by which worms are used to convert organic materials (usually wastes) into a humus-like material known as vermin-compost

Solid wastes not collected and disposed efficiently, pollute and degrade essential land and water resources. Uncollected or untreated garbage creates serious human health hazards by attracting disease carrying vermin and insects. The inexpensive dumping or littering or burning of municipal wastes pollutes the environment. This view keeping in the mind we decided to organize such kind of program in favor of the UG and PG students.

iii. Objectives of the Workshop

- To bring awareness about vermicomposting and culture to avoid pollution
- To promote for setting up of a vermiculture unit.

iv. Details of Participants:

71 participants (19 Male and 52Female)attended the guest lecture.

v. Brief Summary of Events/ Sessions:

Dr. K. N. Kadam covered almost all aspects of vermicomposting. Further he guided about how to set the vermicomposting unit and informed about benefit of vermicomposting. In this program Concept note was given by Dr. D. S. Rathod Head, Department of Zoology and Fishery Science and Vote of Thank given by Miss. Madhuri Bhande

vi. Conclusion, with Feedback on the Programme:

Students learned the various benefits of vermiculture and vermicomposting and setting of unit of vermicompost.
