B) Report

i.Title: Online Guest Lecture on Animal Behaviour

ii.Introduction:

Animal behavior includes all the ways animals interact with other organisms and the physical environment. Behavior can also be defined as a change in the activity of an organism in response to a stimulus, an external or internal cue or combo of cues.

The study of Animal Behaviour is the most important requisite for animal handling, domesticating and experimentations in various fields such as Psychology and Medical research etc. There are many angles of animal's reactions to the various stimuli which are the combined result of all types' previous information.

Behavior is anything an animal does involving action and/or a response to a stimulus. Some of the examples involve blinking; eating, walking, flying, vocalizing and huddling are all examples of behaviors. Behavior is broadly defined as the way an animal acts.

By considering the importance of animal behavior the present lecture was organized.

iii.Objectives of the Programme / issues addressed:

- To upgrade the students knowledge in Animal behavior studies.
- To inculcate research methodology in Animal behavior.
- To give the stepwise procedure of animal behavior and its relevance for analysis of behavior for various purposes.

iv. Details of Participants:

About 71 participants like teachers, students were present for guest lecture. Which of these 45 were female participant and 26 were male participant.

v. Brief Summary of Events/ Sessions:

The lecture was highly knowledge boosting and experience sharing. As well it was motivating for the students and researchers to enter in the field of Animal behavior studies and Research. Students were satisfied as Dr. Balasaheb Salve's lecture as lastly he satisfied the students by answering the questions they found in Animal behavior. So overall this Guest lecture was boosting the knowledge of all UG and PG Students.

vi. Conclusion, with Feedback on the Programme:

He interacted with students and answers their questions. This lecture provided the knowledge in analysis of animal behavior.

The screenshot shows a Microsoft Teams meeting interface. The main window displays a presentation slide titled "Fireflies using luminescence". The slide content includes:

- Male fireflies cruising for mates flash a species-specific pattern to announce their availability to receptive females.
- An interested female will reply, helping the male locate her where she's perched, often on low vegetation.

The slide also features a photograph of a firefly on a green leaf. The Teams interface shows a list of participants on the right, including Dr. D.S. Rathod (Organizer), Dr. M. Jagtap, Dr. K. S. Raut, Madhuri Bhande (Guest), R.D. Kamble, and Dr. B. S. Salve (Guest). The bottom of the screen shows the Windows taskbar with various application icons.

The second screenshot shows the same Microsoft Teams meeting, but the presentation slide has changed to "Types of animal communication". The slide content includes:

- 1. Auditory Communication

The Teams interface and participant list remain the same as in the first screenshot. The bottom of the screen shows the Windows taskbar with various application icons.
