B) Report

i.Title: Guest lecture on World Water Conservation Day

ii.Introduction:

As we know that the population of India after Independence is increasing continuously and grown from 22 crores to 140 crores now in 2022. So the requirement of all domestic needs is also increasing therefore there is stress on natural resources, water is the most essential commodity. Ex. UN Secretary Kofi Annan in 2010 has pointed out the forthcoming problem of water scarcity and said that in future the wars will be for Water. By keeping the problem in mind this activity was organized on 'World water conservation Day'. The main aim is to percolate the importance of conservation of water among students one Online Guest lecture was organized by the resource person focusing on the importance of water conservation. As it is well known that water requirement is less but we waste more so it is essential to take efforts for this and activities to encourage the citizens for absolute use, inhibiting the excess use filtering, roof water harvesting, reusing the water etc.

iii. Objectives of the Programme / issues addressed:

- To upgrade the life style of students minimum use of water to domestic activities.
- To inculcate the stepwise method in roof water harvesting to increase the ground water table.
- World water conservation day may change the mind and students may take initial steps for conservation of water.

iv. Details of Participants:

About 66 participants like teachers, students were present for guest lecture. Which of these 49 were female participant and 17 were male participant.

v. Brief Summary of Events/ Sessions: The water conservation talk was highly knowledge boosting for different ideas and methods. As well it was motivating for the students and researchers to water conservation, During this Water Conservation Day all the Students were satisfied as Dr. Karmavir N. Kadam **lastly** answered all the questions they found in water conservation activity. So overall this activity was guiding for conservation of water of all UG and PG Students in the field of hydrobiology and aquaculture.

vi. Conclusion, with Feedback on the Programme:

He interacted with students and answered their questions. This conservation Talk was found to be effective.
