B) Report

i) Title: Poster Presentation aquaculture awareness

ii) Introductions:

Aquaculture is one of the fastest-growing food-producing sectors in the world, playing a vital role in meeting the rising demand for protein-rich food, improving rural livelihoods, and supporting environmental sustainability. Recognizing the importance of educating students about modern developments in fishery science, the Department of Zoology and Fishery Science organized a **Poster Presentation on Aquaculture Awareness**. The programme aimed to enhance students' knowledge of aquaculture systems, fish health management, breeding techniques, water quality monitoring, and the economic potential of fish farming. By encouraging scientific creativity and interactive learning, the event provided a platform for students to explore current trends in aquaculture and understand its significance in ensuring food security and conserving aquatic biodiversity.

iii) Objectives of the Programme:

1. To raise awareness about the importance of aquaculture in food production and livelihood generation.
2. To educate students about sustainable fish farming techniques and aquaculture systems.
3. To provide knowledge on fish breeding, hatchery management, and water quality maintenance.
4. To promote scientific skills through poster presentations on various aquaculture themes.
5. To encourage students to explore aquaculture as a research-oriented and entrepreneurial field.

iv) Details of Participants:

A total of **51 participants** (13 Male and 38 Female) attended the **Poster Presentation on Aquaculture Awareness**.

v) Brief Summary of Events:

The Department of Zoology and Fishery Science organized the Poster Presentation on Aquaculture Awareness in 25.09.2025, with active participation from undergraduate students. The event began with an inaugural session and welcome address by faculty members, emphasizing the significance of aquaculture in ensuring nutritional security and economic development.

Posters covered themes such as:

- Sustainable Aquaculture Systems
- Role of Water Quality in Fish Health
- Fish Nutrition and Feed Formulation
- Modern Hatchery Techniques
- Ornamental Fish Culture
- Aquatic Disease Management

Faculty resource persons delivered short talks on topics including “Recent Trends in Aquaculture Science” and “Best Practices in Fish Farming.” Students explained their posters to visitors, demonstrating scientific knowledge, creativity, and communication skills. The event also included interactions on practical aspects of aquaculture, supported by laboratory specimens, models, and demonstration setups.

vi) Conclusion:

A total of 43 students visited the department during the event, where they observed scientific posters, experimental setups, and museum specimens. The programme significantly enhanced their knowledge of aquaculture practices, aquatic biodiversity, and fishery science.
