2 May 2020

Dr Vihang Patil  
Department of Biotechnology,  
Rajarshi Shahu Mahavidyalaya (Autonomous),  
Latur, India

Dear Dr Patil,

Thank you for your email dated 08 April 2020, requesting a joint collaboration between our institutes.

I am pleased to communicate my availability and willingness to collaborate with you and write a research proposal under the scheme of "ASEAN - India Science & Technology Development Fund".

Re-emergence of Infectious coryza is major issue in Southeast Asia. Development of autogenous vaccine could be a better preventive measure against this economically devastating disease.

Your research work is one of the best systematic studies performed on Indian *Avibacterium paragallinarum* isolates and it is acknowledged widely by research community . Our teaming up together would surely bring something beneficial for Asian poultry sector.

Thank you.

Sincerely,

(Prof. Dr. drh. Agnesia Endang Tri Hastuti Wahyuni, M.Si)  
Head of Magister of Study Program Saint Veteriner Faculty of Veterinary Medicine  
University of Gadjah Mada, Indonesia
