

Rajarshi Shahu Mahavidyalaya, Latur

(Autonomous)

Kaku Seth Ukka Marg, Chandra Nagar, Latur – 413512 (Maharashtra) (Affiliated to Swami Ramanand Teerth Marathwada University, Nanded) NAAC Accredited Grade B++ (Cycle 3) with CGPA 2.99, UGC-CPE (Phase-III) ISO: 9001:2015

Best Practice II DigiRAJ: Creating Path for Digital Campus

2018-2023

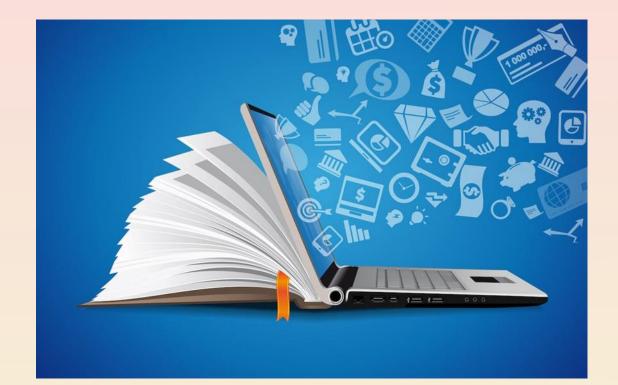

FORWARD

Rajarshi Shahu Mahavidyalaya is renowned for its cutting-edge, student-focused approaches to giving its students an education suitable for the modern world. The institute is located in a rural area with limited access to air and rail transportation. Despite the fact that the majority of the students come from rural areas, they are deserving of all new advancements in their academic careers. Rajarshi Shahu Mahavidyalaya consistently offers superior environments that support students' holistic development. Education also evolves with the times, moving from chalk and duster to Wi-Fi. Although the institution considers integrating new technologies into its operational framework, it also prioritizes social responsibility and strives to collaborate on moral education courses. The mission of the institution is to cultivate in the youth a spiritual and highgrade technological mind. There are definitely constraints to the information that academic courses and activities may convey to teachers, staff, and students about the role that technology plays in creating a positive work culture and the significance of moral education in maintaining human values. However, it is imperative that we focus on these facets of life at this time in order to advance the country. The institute has established centres like the Shahu Extension Services Centre (SESC) and Digital Helpers (DH) with the objective to achieve substantive outcomes and transmit its mission in a genuine way. These centres operate in accordance with the institute's core principles, which are to uphold and advance Academic Excellence, Honesty and Integrity, Respect for one another and Diversity, Extend Knowledge Base, Collective Governance, Social Commitment, Acquiring Lifelong Knowledge, Ethics, National Service; and Environmental Awareness.

Two best practices that uphold these institutional fundamental principles have been identified for execution. **PRAYAS**, which stands for **Promotion of Responsible Activities for Youth and Society**, is the first practice that attempts to improve bonds between the institution and the community. The founders of the institution not merely aimed to promote academic excellence but also to build an ideal society, which is why they involved staff and students in social initiatives like as tree planting, rainwater harvesting, rural development, etc. Among the various events the SESC plans every year is a campaign to raise awareness of the importance of conserving water and planting trees, in addition to student participation for rural development initiatives. The second best practice, **DigiRAJ: Creating Path for Digital Campus**, facilitates the institute's transition from traditional teaching-learning and administration methods to digital campus by giving staff and students access to the newest technologies while also aiming to create a productive learning and teaching environment. These two practices are structured to enable the institution to address the idea of education put forth by APJ Abdul Kalama, which states that "The purpose of education is to make good human beings with skill and expertise."

Introduction to Best Practice II

DigiRAJ: Creating Path for Digital Campus

Rajarshi Shahu Mahavidyalaya earned accolades for its cutting-edge educational approach, providing staff and students extensive access to the latest knowledge. In order to provide students from rural background with access to high-quality higher education, the institution has adapted to the needs of the modern world. The primary requirements of the institution include familiarizing and introducing the students to the most recent technical developments as well as keeping them abreast of how quickly the world is changing. In addition to this, the institution tries to give its employees the finest technological assistance for their efficient working practices. Thus, a passionate practice of boosting ICT use in all institutional operations is represented by **DigiRAJ: Creating Path for Digital Campus**, which is almost in accordance with the **Digital India programme, a landmark initiative of the central government**.

A digital campus often referred to as a "smart campus" or "digital learning environment," to use technology for enhancing the educational experience and administrative processes within the institution. In determining this Best Practice, consideration is given to both the numerous advantages of technology in modern education and its essential necessity. The unique RSML ERP Software installation on the institution's two servers—one located in Mumbai and the other on campus—allows for the proper implementation of this practice. **DigiRAJ: Creating Path for Digital Campus** provides students and faculty with access to a wealth of online educational resources, including e-books, videos, research databases, and interactive learning materials. It enables adaptive learning platforms that can customize content and pace to individual students' needs, promoting a more personalized learning experience. It also offers collaborative tools like video conferencing, discussion forums, and real-time document sharing, facilitating communication and group work among students and faculty. It allows for remote or online learning, which is crucial during emergencies (e.g., pandemics) and provides flexibility for students with diverse needs or geographical constraints.

Through **DigiRAJ: Creating Path for Digital Campus**, students can access course materials and resources at any time, making it easier to balance their studies with other commitments. It makes the campus paperless. Digital campus streamline administrative tasks such as enrollment, registration, and result declaration reducing paperwork and improving efficiency. Digital campus incorporates feedback systems that allow students to provide input on courses and educational materials, fostering continuous improvement.

The **DigiRAJ: Creating Path for Digital Campus** resource is available to staff members for use in their official and academic activity. The teachers use the Online Teaching Diary to document their daily academic calendar, submit the students' attendance online, communicate with the students via what's App groups, share notes via Google Classroom, and administer tests.

The Alumni Portal serves as a conduit between the institution and its alumni as part of **DigiRAJ**: **Creating Path for Digital Campus.** In addition to registering alumni, this portal gives them a

way to interact with current students and promote their careers through the Alumni Business Diary.

In short, **DigiRAJ: Creating Path for Digital Campus** enhances the educational experience, increases accessibility, improves administrative efficiency, and can offer cost savings while keeping pace with technological advancements and catering to the needs of a diverse and digitally connected student body.

The institution has worked in the following areas to provide them with the technology asset:

RSML ERP

Introduction

Following a few years of languishing with a general-purpose ERP, the RSML autonomous institute came to the realization that they needed a customized ERP system that could support their institutional hierarchy and operations. After careful consideration, Matter Softwares Pvt. Ltd. was selected to develop this kind of tailored ERP system.

Purpose:

For an autonomous institute to effectively manage its administrative and academic functions, a customized ERP system is needed. A centralized platform for handling financial transactions, course scheduling, faculty data, exam scheduling, student admissions, and academic records is offered by such a system. It improves information quality and accessibility, expedites procedures, and helps the institution retain its independence by enabling customized features that complement its distinct academic policies and governance.

Beneficiaries:

The key stakeholders of this ERP system are:

- 1. Students
- 2. Parents
- 3. Staff Teaching
- 4. Staff Non-Teaching
- 5. Admins
- 6. Clerks
- 7. Management
- 8. Administrator

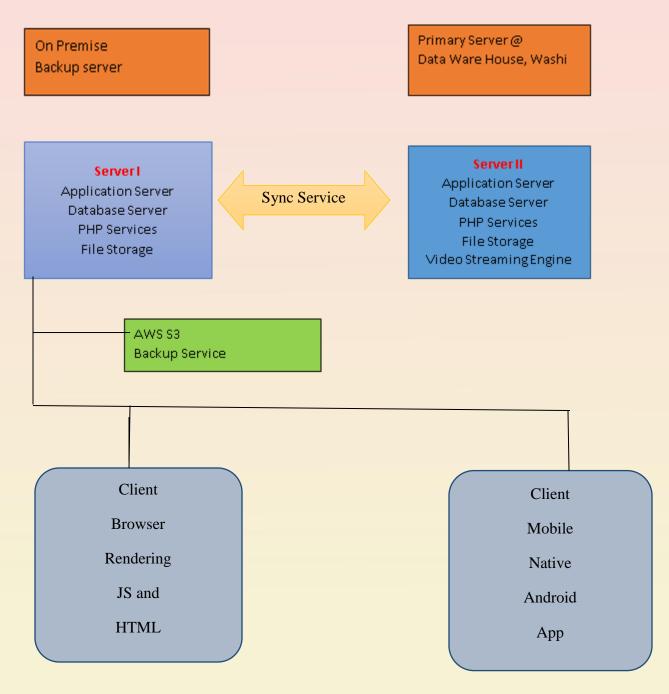

All the aforementioned stakeholders can easily utilize this software. They use it for every relevant function and find that the software's streamlined structure makes work completion effortless.

System Overview

• Architecture:

RSML ERP is a cloud-based client-server architecture dynamic web application. It is hosted on premise server with specifications such as 512 GB of RAM and 100 TB of hard disks. For fault tolerance, the system is also available on a twin server hosted in the Mumbai data centre. Both systems maintain up-to-date copies of the application and its backend with an auto-sync service in place.

• Technologies

The system is developed using open-source technologies for the ease of update and maintenance in the future.

1. Backend Services: PHP Code Ignitor 4

2. Frontend: Bootstrap, jQuery

3. Database: MySQL

4. Native Android Application for the students

• Database Design

All the MySql standards are considered while designing the database. The database is normalized to 3NF. With primary keys assigned to each table separately. Relevant tables are connected using the reference keys. Also, the tables are well-indexed for fast data retrieval during reporting functions.

Backend Logic

The back end of the application is built in the PHP Code Ignitor 4(CI4) framework. It uses MVC architecture to separate the business logic from views and the database is abstracted using models.

• Frontend Development

The front end uses Bootstrap for the HTML and CSS part and JQuery for most of the JavaScriptrelated functionality. The front end is dynamically generated using the view part of the MVC architecture implemented in the CI4 framework.

• Security Measures

Data Security is achieved through database-level encryption. Application-level security is achieved by tokenized service endpoints. Server-level security is managed by whitelisting access using a Public/Private key only. No intruder with any brute force capability can log into the server.

• Testing and Quality Assurance

Every feature is unit-tested. Every module underwent UAT (user acceptance testing). The final level of testing is integration testing which takes place after every new feature development.

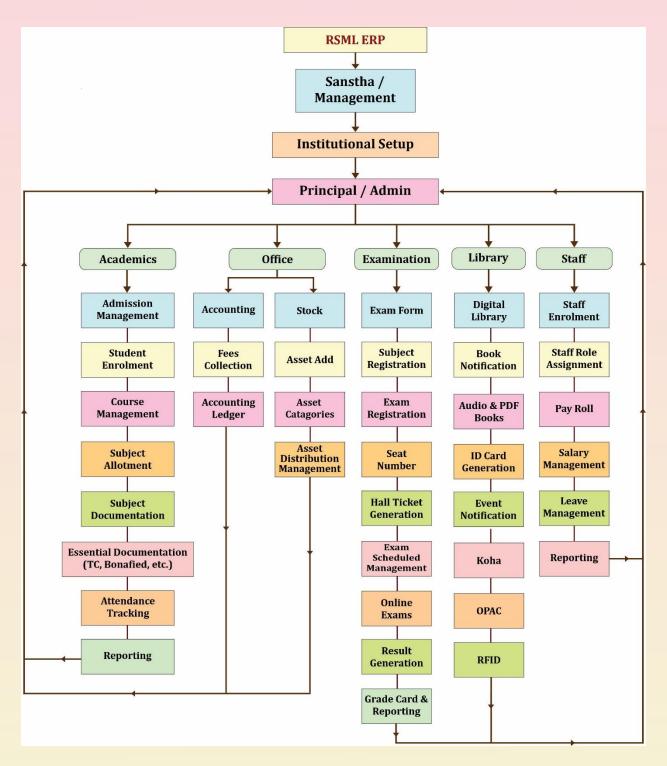

• Deployment

All the developed application is tested on a staging environment. Only an authorized DevOps engineer is allowed to deploy the code on the production server after notifying the application downtime to the concerned stakeholder. After deployment sanity testing is done again to make sure everything is in order as expected.

• Maintenance and Updates

The system undergoes regular maintenance monthly, quarterly and yearly basis for different parts of the application. Monthly updates are necessary for transaction-heavy use cases such as accounting entries and fee entries. Data archival is done every quarter for the less active tables such as the notices and library entries. The system undergoes regular updates on the relevant modules such as academics and examination as per the newly drafted NEP. The fees module is also updated regularly as per government and other scholarship circulars.

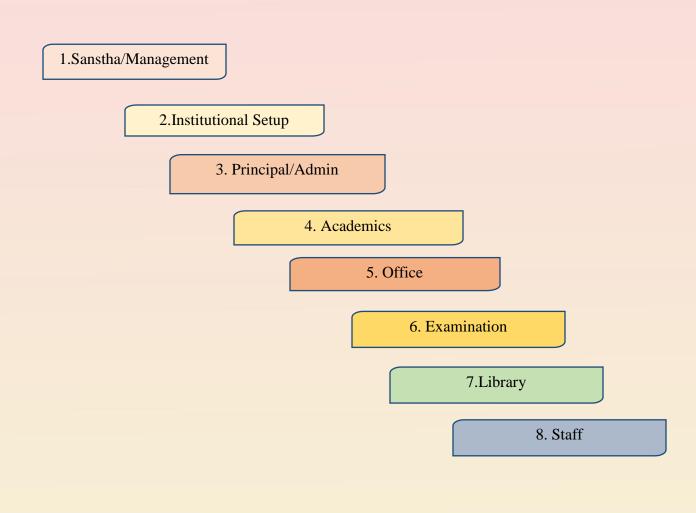

• Features and Functionalities

• Software Components

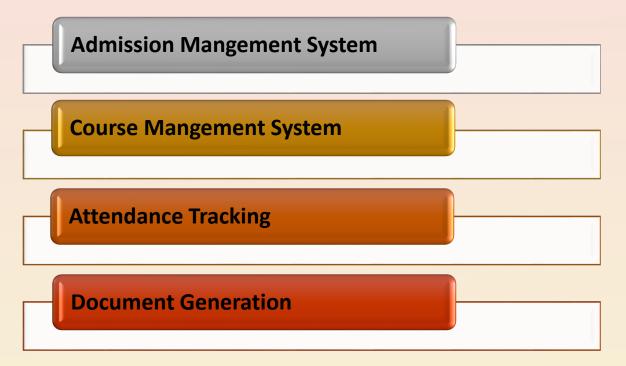

RSML ERP has created specific components in order to provide the technological asset and acquire the appropriate database for additional mechanisms. It will be easy for everyone who is concerned to complete the work at hand because these components are interconnected.

They are:

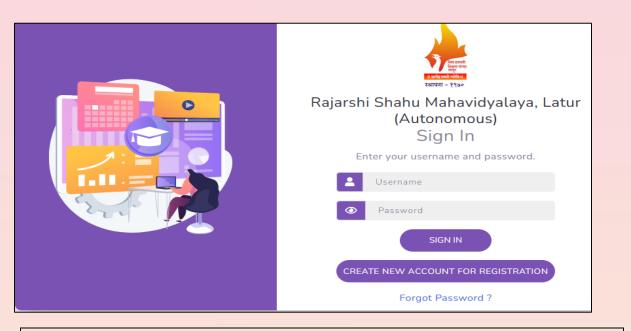

1. Academic Management System-

The Academic Module of the RSML ERP (Enterprise Resource Planning) system is a robust platform designed to streamline and enhance various academic processes within educational institutions. This module encompasses a comprehensive range of features, including admission management, course management, subject management, attendance tracking, and the generation of essential documents such as Transfer Certificates (TC), Bonafide certificates, and other necessary paperwork. With its user- friendly interface, the Academic Module facilitates efficient management of student admissions, allowing institutions to seamlessly handle enrollment processes. It also enables educators to organize and manage courses and subjects effectively, ensuring a structured academic curriculum. The attendance tracking feature helps monitor student participation, contributing to a more accountable and engaged learning environment. Additionally, the module automates the generation of critical documents, reducing administrative workload and ensuring accuracy in record-keeping. Overall, the RSML ERP Academic Module is a smoother academic workflow.

Registration	
Merit List/Notices	Rules and Regulation
UG Programmes	
UG Admission Rules	 Admissions for all the programmes are strictly on the basis of the aggregate marks aualifying examinations.
Fee Structure	 The reservation policy, rules and regulations of Government of Maharashtra and Pare University are strictly followed.
Prospectus	3. In case the seats of the reservation category remain vacant, these are filled as per th
Enquiry	rules. 4. Wherever necessary, admissions for special programmes will be given on the basis
Infrastructure	entrance test, which is conducted by the college.
Laboratories	As admissions for all programmes are through the registration, the dates of registration are notified by the college on website/notice board, well in advance.
Sports	6. Admission schedule is followed strictly and late applications are not entertained.
Activities	 Final admissions are ascertained only when the original documents and fees for the academic year are paid. Till the finalization of eligibility all the admissions will be considered as 'Provisional'.
	 The admissions for the UG programmes are finalized up to 15th July and PG programm up to 31st July of the concerned academic year.
	9. The admissions are valid for one academic year only.
	10. The students from the other colleges/Universities are admitted after the decision

2. Office Management System-

The Office Management System is a crucial tool for office governance. As a result, office tasks appear to be easier, faster, and less error-prone.

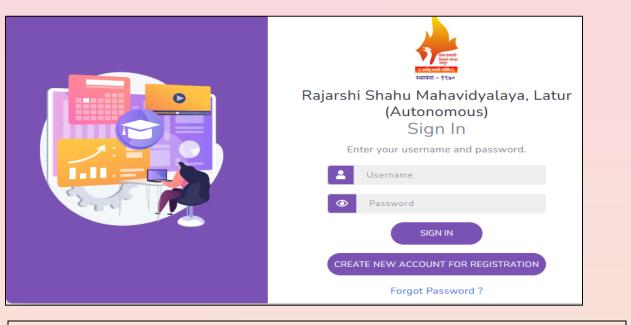

2.1 Account Management System

The Accounting Module within an Educational ERP system plays a pivotal role in efficiently managing fees collection and maintaining precise ledgers. This module streamlines the fees collection process, offering features like online payment integration, fee structuring, and automated invoice generation. It ensures transparency in financial transactions and reduces the likelihood of errors in fee calculations.

Moreover, the module maintains comprehensive ledgers, including student ledgers that track individual financial records, and cashbooks that meticulously record all financial transactions. By automating these processes, the Accounting Module not only saves time but also enhances accuracy and accountability.

Institutions can easily access real-time financial data, facilitating informed decision-making. Overall, the Educational ERP Accounting Module is a crucial tool for seamlessly managing fees and maintaining accurate financial ledgers, contributing to efficient financial administration within educational institutions.

2.2 Stock Management System:

The Stock Module in the RSML ERP system is an integral component designed to streamline and optimize inventory management within an organization. This module provides a comprehensive platform for monitoring and controlling stock levels, tracking item movements, and managing replenishment processes. It facilitates real-time visibility into stock quantities, ensuring that businesses can efficiently manage their resources and avoid stock outs or overstock situations. The RSML ERP Stock Module allows for seamless integration with other modules, such as Sales and Purchasing, ensuring accurate and up-to-date information across the entire system. With features like automated stock alerts, order management, and robust reporting tools, the module empowers businesses to make informed decisions regarding their inventory, contributing to improved operational efficiency and cost-effectiveness.

3. Examination Management System-

The Exam Module within an Educational ERP system is a comprehensive tool designed to streamline the entire examination process. It encompasses various features to facilitate a smooth and organized examination administration. The module starts with the creation of exam forms, allowing easy setup and configuration of different types of exams. It enables exam registration, ensuring a systematic and efficient process for students to enroll in their respective exams. Subject exam registration further refines the process, allowing students to choose specific subjects for examination.

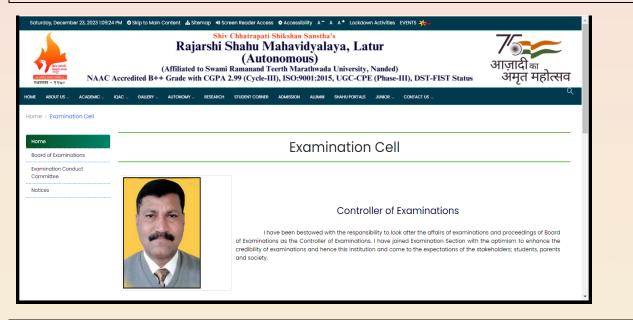

The module also includes functionality for entering and managing marks, ensuring accuracy and reliability in recording student performance. It facilitates the generation of hall tickets, providing students with essential details for their exams. Schedule management ensures that exams are conducted in a timely and organized manner, avoiding scheduling conflicts.

Result generation is a critical feature, automating the computation of grades and overall performance. Additionally, the Exam Module produces detailed exam reports both before and after exams, offering insights into student performance, exam logistics, and other relevant data. Overall, the Exam Module in an Educational ERP system enhances efficiency, reduces manual workload, and ensures a well-organized examination process from registration to result analysis.

5. Staff Management System and Student Profile System-

5.1 Staff Management System

The Payroll Module in the RSML ERP system is a crucial component dedicated to efficiently managing payroll processes within an organization. This module automates and streamlines various aspects of payroll management, including salary calculations, tax deductions, and benefits administration. It ensures accuracy and compliance with regulatory standards, reducing the risk of errors in payroll processing. The RSML ERP Payroll Module facilitates seamless integration with other modules, such as HR and Accounting, ensuring that all relevant data is synchronized across the entire system. This not only enhances efficiency but also provides administrators with real-time insights into payroll-related information. With features like automated pay slip generation and comprehensive reporting tools, the RSML ERP Payroll Module contributes to a more organized, transparent, and efficient payroll administration, ultimately benefiting both the organization and its employees.

6. Digital Documentation System-

A digital documentation system is an online monitoring tool used to evaluate the performance of students, staff, and departments. It supports NAAC documentation and is crucial for the development of self-appraisals in accreditation and ranking processes. For the documentation, Microsoft Teams tool is used.

7. E-Learning Management-

The E-Learning Management System effectively integrates social, mobile, and virtual classroom features into a single, secure platform that can fulfil the needs of the educational institution while delivering lectures in the era of technology. It is a comprehensive implementation of LMS like MOODLE, ZOOM, MS Teams, Google Classroom, etc.

9. Digital Event Management system-

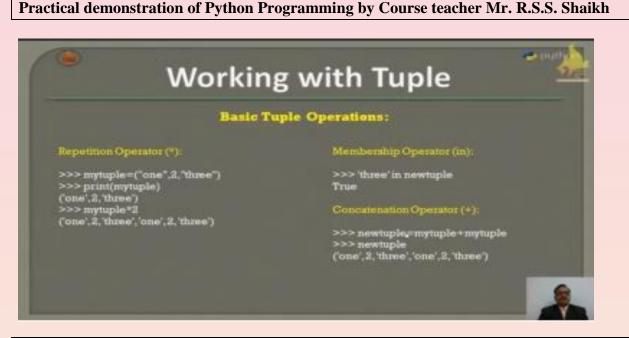

The institute creates its own digital event management system, which offers online certificate programmes, online teaching, and the ability to run extracurricular and co-curricular activities online. This approach works well because it saves time, money, and provide inherent documentation facility.

9.1 Online Certificate Course

Online certificate course "Python Programming"

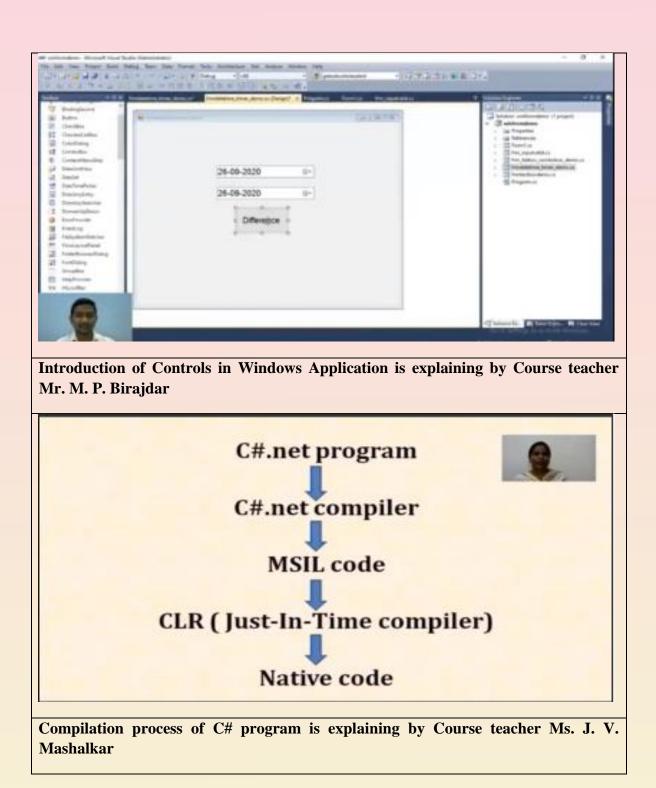

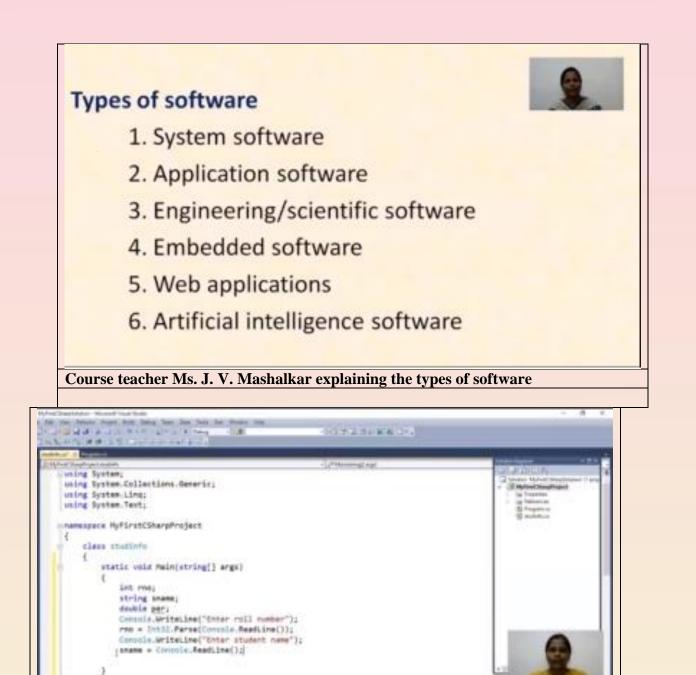

Course teacher Mr V. D. Panchal explaining the concept Tuple in Python

• Online certificate course "Software Development with C#.Net"

ter in America Desert	-100	ant () settinger; series, Trething a	
public partial class Formi	: Fore		
public Formi()			
(InitializeComponent	0:		
)			
private void Fermi_Load	(object sender, EventArgs e)		
1//1. Display message Persagebre.Show("He	lla this is messagebox"};]	1	
-			

Course teacher Ms. J. V. Mashalkar giving practical demonstration of Console Application in C#.Net

• Online certificate course "Computer Networking Techniques"

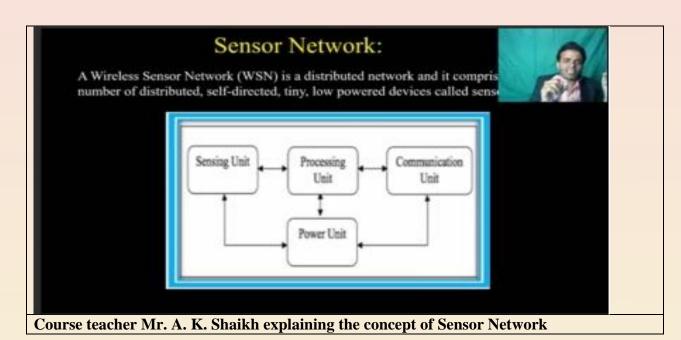

Introduction to Wireless Network.

Why it is called flexible?

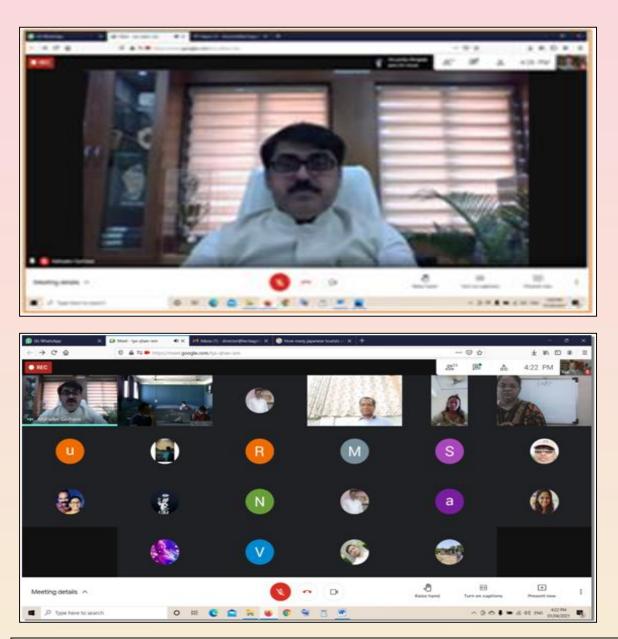

When you are using any smart phone, tablets or devices that supports Wi-Fi then you can move from one place to another without any kind of hesitation.

Course teacher Mr. A. K. Shaikh explaining the concept of Wireless Network

10. Digital Administration

Administrators can easily monitor the day-to-day activities of staff and students with the help of digital administration. This not only makes communication simple, but it also reinforces teachers and students of their responsibilities.

10.1Digital Teaching Diary:

SAVE TREES TO SAVE LIFE

AUTONOMY

The plants are reservoirs of natural products. Indefinite natural products that they produce are useful to the human beings. In addition to the foodstuff, the plants are the resources for human requirement like medicines, paper, furniture, fabrics, etc. In other words, the plants fulfill all basic needs of human. Therefore, the study of plants is very significant for sustainable life. The visionaries of our institution realized the requirement of this peculiar subject. And hence the Department of Botany came into existence in our institution.

The Department of Botany is established in the year 1971 with the vision and efforts of Founder Head Honorable Principal Anirudh Jadhav. The main view behind the establishment was to prepare the students desirous of learning, understanding, teaching and practicing various aspects of Plant Science. It is one of the leading departments in the field of teaching and student activities. After autommy, in keeping pace with the advances in various aspects of Plant Sciences, the department has introduced the courses like Molecular Biology, Cell Biology, Plant Biotechnology, Bioinformatics, Genetics, Plant Pathology, Instrumentation in Botany, Pharmacognosy, Gardening and Landscaping, Plant Breeding, Biostattics, Plant nanotechnology, Forensic Botany, etc. The department has academic autonomy and has been revising its syllabi after every three years at UG level and two years at PG level. The department has successfuly implemented the choice based credit system for grading the students. The department is known for curricular activities like teaching, learning and the results as well as co-curricular activities. It is also known for strict implementation of rules and regulations formulated time to time by the college administration.

The department has undertaken the student's projects in the areas of Plant Pathology, Genetics, Plant Biotechnology, Medicinal Plants, Aerobiology etc. The department runs M.Sc. Degree Course from 2017. The M.Sc. degree course is spread over four semesters. At present the students are admitted to M.Sc. degree course on the basis of their scores of the B.Sc. degree. The curriculum of B.Sc. and M.Sc. has been designed by taking into account the competitive examinations, NET, SET, GATE and IIT-JAAM examinations.

During the first year of M.Sc., the students are taught core courses in Botany. In the second year, besides the core double of the students also carry out the projects. The examinations of B.Sc. and M.Sc. students are held as per the credit system rules laid down by the automonious college. It involves continuous assessment that is internal assessment and semester end examination. The department regularly organizes the student's seminars.

ABOUT	DEPARTMENT OF BIOTECHNOLOGY
FACULTY	
CURRICULUM	The Department of Biotechnology established in the academic year 2004-05 with the B.Sc. Biotechnology at undergraduate level. The
TEACHING PLAN	department started Postgraduate programme M.Sc. Biotechnology in the year 2005-06. In recent years biotechnology has made significant advances and emerged as a front line area of research and development with an overwhelming impact on the society. Biotechnology is the
TIME TABLE	injection of scientific knowledge into manufacturing process by which marketable goods are made out of biological phenomena. It involves the
ACTIVITIES	study of methods by which living resources can be tailored to generate industrial processes and novel specimens for use in agriculture, forestry, horticulture, medicine, health and environment. Commercial potential of biotechnology is immense since the scope of its activities covers the entire
PROJECTS	spectrum of human life. Biotechnology is an indispensable discipline in modern technological education and has attached considerable attention. Excellence in biotechnology is a must to remain internationally competitive. Biotechnologist are required in all Agro based biotechnological
ACHIEVEMENTS	companies, quality control divisions, research and development divisions of pharmaceuticals industries, genome based projects in animal and
ASSOCIATION	plant tissue cultures. Many biotechnological companies are coming up in and around Maharashtra. They all require talented and well groomed biotechnologists. The Department has experienced, qualified, research minded and highly motivated staff. Qualified and inighly dedicated
MoU's	members of the staff had carried out research work at their own accord with available resources and facilities. Go to Settings to activate Windows.
